PROFESSIONAL SUMMARY

Frontend Developer experienced in React.js, building scalable and user-friendly web applications. Currently working as a Junior Software Developer, with experience in component-driven development and efficient API integration using TanStack Query.

Skilled in JavaScript, HTML, and CSS, with a strong focus on performance optimization and clean, maintainable code. Passionate about creating intuitive user interfaces and continuously improving through real-world development experience.

EXPERIENCE

•Royale Cheese Innovations LLP

Aug 2025 – Present

Software Developer

- Developing scalable and reusable UI components using React.js for production applications.
- Managing server state and API integration efficiently using TanStack Query.
- Improving application performance through optimization techniques and best coding practices.
- Collaborating with cross-functional teams to deliver responsive and user-friendly interfaces.

•Royale Cheese Innovations LLP

Jan 2025 – Jul 2025

Software Developer Intern

- Built dynamic and responsive user interfaces using React.js and modern JavaScript.
- Integrated REST APIs and handled asynchronous data efficiently.
- Worked on component-based architecture to enhance code reusability and maintainability.
- Gained hands-on experience with real-world development workflows and version control (Git).

PROJECTS

• React Snackify – Open Source React Package (npm) | Link

- Published a reusable open-source React notification library (react-snackify) on npm to simplify snackbar implementation in web applications.
- Developed a plug-and-play SnackbarProvider architecture enabling easy integration with minimal setup across React projects.
- Implemented highly customizable notification system supporting multiple themes, positions, animations, async updates, and action handling.
- Designed a lightweight and dependency-free solution optimized for performance, flexibility, and modern UI/UX standards.

• TripVault – Travel Memory Platform | Source Code

- Developed a scalable full-stack MERN application to capture, organize, and share travel experiences through interactive trip-based modules.
- Built secure authentication system with user profiles, enabling personalized access, activity tracking, and profile management.
- Engineered social and collaboration features including media uploads, tagging system, likes, comments, notifications, and shared trip workflows.
- Implemented search and discovery features with tag/location-based filtering, bucket list management, and interactive map-based visualization of global trips..
- Technology: ReactJs, MaterialUI, NodeJs, MongoDB

• StudyNotion | Source Code

- StudyNotion is a versatile and intuitive ed-tech platform that is designed to provide an immersive learning experience to students and a platform for instructors to showcase their expertise.
- StudyNotion is a fully functional ed-tech platform that enables users to create, consume, and rate educational content. The platform is built using the MERN stack, which includes ReactJS, NodeJS, MongoDB, and ExpressJS.

• Hospital Management System | Link

Contributed in frontend of website and in chatbot development

- Our Platform has features like Appointment Booking, Video Conferencing, Chatbot, Medical Science Awareness
- Technology: Python, Streamlit, Decision Tree and Joblib, PHP, WebRTC, HTML, CSS, and JS,

• GYM Website | [Link](#) | [Source Code](#)

- Designed to Dive into the world of fitness with Sport Club.
- It Contains Description of various Programs, Subscriptions Models, Testimonials and User can also join the community of Sport Club.
- Technology: ReactJs, EmailJs

• Dice Game | [Link](#) | [Source Code](#)

- Developed to give simple and intuitive interface for seamless gaming to users.
- In this interactive game, users engage by guessing a number before rolling the dice. If their guess matches the rolled number, they earn points. otherwise, points are deducted.
- Technology: Reactjs

• Restaurant Website | [Link](#) | [Source Code](#)

- Crafted an intuitive interface catering to the needs and preferences of our audience.
- Explore menu offerings, read customer reviews, and find your way with our interactive map.
- Technology: Reactjs, Google Map API

EDUCATION

G H Patel College of Engineering & Technology, Vallabh VidyaNagar

Bachelor of Engineering, Information Technology

2021 - 2025

8.28 CGPA

P. P. Savani School, Ankleshwar

12th Science Group-A (GSEB Board)

2019 - 2021

82.46%

Lions School, Ankleshwar

10th Board (GSEB Board)

2018 - 2019

82%

TECHNICAL SKILLS

Frameworks: React.js, Express.js, Node.js, TailwindCSS, Redux, Webflow

Databases: Firebase, MongoDB, Relational Database(mysql, postgresQL)

Languages: C, C++, Python, Java, Javascript, and HTML/CSS.

Tools: Git, Github
