

Dear Hiring Manager,

I am writing to express my interest in the **Frontend Developer** position. I am currently working as a **Software Developer** with professional experience in **React.js**, **JavaScript**, **API integration**, and building scalable, user-friendly web applications.

In my current role at **Royale Cheese Innovations LLP**, I develop **reusable React components**, integrate and manage APIs using **TanStack Query**, and work on **performance optimization** and maintainable code. I also collaborate with cross-functional teams to deliver responsive and intuitive user interfaces.

Alongside my professional experience, I have built several projects, including **React Snackify**, an **open-source React package published on npm**, and **TripVault**, a full-stack **MERN application** featuring authentication, media uploads, social interactions, search, filtering, and map-based visualization. These projects have strengthened my skills in **component architecture**, **API integration**, and **full-stack development**.

I am passionate about building **clean, scalable, and user-focused applications** and continuously improving my technical skills. I would appreciate the opportunity to contribute my experience to your team and grow as a developer.

Thank you for considering my application. I look forward to discussing how I can contribute to your organization.

Sincerely,

Poojan Dhebariya
